

User Journey Map

Optimizing User, Group, and Role Management with Access Control and Workflows

SCENARIO

A Project Manager (Alice) manages projects, assigns tasks, controls access, and reviews progress using role-based access and automated workflows.

Entice

How does someone initially become aware of this process?

Enter

What do people experience as they begin the process?

Engage

In the core moments in the process, what happens?

Exit

What do people typically experience as the process finishes?

Extend

What happens after the experience is over?

Steps

What does the person (or group) typically experience?

Interactions

What interactions do they have at each step along the way?

- **Things:** What digital touchpoints or physical objects would they use?
- **Places:** Where are they?
- **People:** Who do they see or talk to?

- Discuss with team
- Understand project requirements
- Review management directions

- Open ServiceNow instance
- Enter credentials
- 2FA verification (if enabled)

- View dashboard widgets
- Check pending tasks & approvals
- See project summary

- Fill project details form
- Set timeline
- Define scope and objectives

- Create/Update users
- Assign roles
- Configure permissions (RBAC)

- Create tasks
- Assign to team members
- Set due dates & priority

- Track task status
- Review updates
- Receive workflow notifications

- Review completed tasks
- Provide feedback
- Approve / Reject

- Verify completion
- Close tasks
- Archive project records

- System sends completion notification
- Inform stakeholders

- Generate project reports
- Analyze performance metrics

- Review insights
- Identify gaps
- Plan process improvements

- Meeting room
- Whiteboard
- Documents
- Team members

- ServiceNow login page
- Laptop/Desktop
- IT Helpdesk (if needed)

- ServiceNow dashboard
- Widgets
- Notifications panel

- Project form
- ServiceNow UI
- Project Manager

- User & Role module
- Access Control (ACL)
- Admin

- Task module
- Task form
- Team members

- Reports
- Task lists

- Comments section
- Approvers

- Close Project action
- Archive records module

- Email / In-App notification
- Stakeholders
- Project team

- Reports module
- Dashboards
- Analytics tools

- Analytics
- Review meeting
- Process documents

Goals & motivations

At each step, what is a person's primary goal or motivation? ("Help me..." or "Help me avoid...")

Help me understand what needs to be done

Help me access the system securely

Help me get a quick overview of my projects

Help me create a well-defined project

Help me ensure right people have right access

Help me assign tasks to the right people

Help me track progress in real time

Help me ensure quality before approving

Help me close projects successfully

Help me keep everyone informed

Help me measure project success

Help me improve future project execution

Positive moments

What steps does a typical person find enjoyable, productive, fun, motivating, delightful, or exciting?

Clear understanding of project goals with team

Quick and secure login experience

At-a-glance insights on dashboard

Smooth project creation with all details

Easy role assignment and access control

Tasks assigned quickly and clearly

Real-time updates and progress visibility

Well-organized approvals and feedback

Project closed with all tasks completed

Instant notification to all stakeholders

Useful reports and performance insights

Continuous improvement in processes

Negative moments

What steps does a typical person find frustrating, confusing, angering, costly, or time-consuming?

Unclear requirements or scope

Login issues or password problems

Too many notifications or cluttered view

Missing mandatory information

Role conflicts or incorrect permissions

Unclear task details or deadlines

Delayed updates from team members

Insufficient information for approval

Pending tasks block project closure

Notifications not received by all

Reports difficult to customize

No action taken on insights gained

Areas of opportunity

How might we make each step better? What ideas do we have? What have others suggested?

Provide clear templates & guidelines

Enable SSO & simplified login

Personalize dashboard views

Add auto-fill & smart suggestions

Role templates & validation rules

Suggest team members automatically

Automated reminders & alerts

Approval summary & guided workflow

Auto-close completed tasks

Customizable notification templates

Advanced filters & visual dashboards

Feedback loop & improvement tracking
