

Project Design Phase Problem – Solution Fit

Date	22 June 2026
Team ID	
Project Name	Optimizing User, Group, and Role Management with Access Control and Workflows
Maximum Marks	2 Marks

PROBLEM – SOLUTION FIT CANVAS

Project: Optimizing User, Group, and Role Management with Access Control and Workflows (ServiceNow)

Refers to: & What to Solve	1. CUSTOMER SEGMENT(S) CS Who is your customer? List the people or organizations this solution is designed for. - Project Managers - Team Members - ServiceNow Administrators - Small and Medium Organizations - IT Departments	6. CUSTOMER CONSTRAINTS CC What constraints prevent your customers from taking action or limit their choices of solutions? (e.g., budget, time, tools, skills, processes, policies, etc.) - Limited IT resources - Security compliance requirements - Budget limitations - Manual approval delays - Lack of centralized access management	5. AVAILABLE SOLUTIONS AS Which solutions are available to the customers when they face this problem? It could be other tools, manual methods, or workarounds. List both direct and indirect alternatives. - Manual Excel tracking - Email-based task assignment - Shared spreadsheets - Basic project management tools - Traditional user administration without RBAC	Explore / AS: Alternatives
Focus the: Jobs to be Done / Problems	2. JOBS-TO-BE-DONE / PROBLEMS J&P What jobs-to-be-done or problems do you address for your customers? These could be needs, pains, or required different tasks. - Manage users efficiently - Control user permissions - Assign project tasks securely - Prevent unauthorized access - Automate task approvals - Improve project accountability	9. PROBLEM ROOT CAUSE RC What is the real reason behind the problem? What is the underlying factor or need driving it, like lack of process, system gaps, regulations, or user behavior? - No proper Role-Based Access Control - Manual permission assignment - Inconsistent user management - Lack of workflow automation - Weak governance and auditing	7. BEHAVIOUR BE What does your customer do to address the problem and get the job done? (i.e., their habits, actions, usage patterns, tools, habits/assumptions, customer segment their role in the customer's journey, etc.) - Users expect quick access - Managers require secure approvals - Team members frequently update tasks - Administrators manage users & permissions - Organizations prefer automated workflows	Focus on the: Why, How, and What
Refers to: Why People Take Action	3. TRIGGERS TR What triggers customers to act? (i.e., seeing their neighbor benefiting from your product, reading a review, needing to reach a deadline or solution to an issue.) - Increase in security incidents - Manual user management takes too much time - Need for workflow automation - Compliance requirements - Growth in project teams	10. YOUR SOLUTION SL If you are creating an existing business, what does your current solution look like? If you are creating a new solution, what is your idea? Try to summarize it here. A ServiceNow-based Role-Based Access Control (RBAC) system that manages users, groups and roles while enforcing Access Control Lists (ACLs). The solution automates task assignment, status updates, and approval workflows using Flow Designer, ensuring secure access, improved governance, compliance, and operational efficiency.	8. CHANNELS OF BEHAVIOUR CH The kind of actions the customers take online? (Search online channels from?) Or offline? Online - ServiceNow Web Portal - ServiceNow Platform - Email Notifications - Workflow Notifications Offline - IT Administration - Project Meetings - Internal Documentation - Team Discussions	Refers to: Where, How, What, and Channels of its
4. EMOTIONS: BEFORE / AFTER EM How do customers feel before they face the problem or a job and afterwards? (i.e., fears, worries, excitement, frustrations, relief, satisfaction, etc.) Before - Frustrated - Concerned about security - Manual workload - Poor visibility After - Confident - Secure - Productive - Better control - Faster task management
