

Project Design Phase Performance Testing

Date	26–27 June 2026
Team ID	
Project Name	Optimizing User, Group, and Role Management with Access Control and Workflows
Maximum Marks	4 Marks

1. Purpose of Document

The purpose of this User Acceptance Testing (UAT) report is to validate that the **Optimizing User, Group, and Role Management with Access Control and Workflows** application developed on the ServiceNow platform satisfies all functional, security, and workflow requirements before deployment.

This report verifies the implementation of User Management, Group Management, Role-Based Access Control (RBAC), Access Control Lists (ACLs), Project and Task Management, and Flow Designer automation. The objective is to ensure that all business requirements are fulfilled and that the application functions securely and reliably for administrators, project managers, and team members.

2. Defect Analysis

This report summarizes all defects identified during testing and their resolution status.

Resolution	Severity 1	Severity 2	Severity 3	Severity 4	Subtotal
Fixed	0	1	2	3	6
By Design	0	0	1	1	2
Duplicate	0	0	0	0	0
External	0	0	0	0	0
Not Reproduced	0	0	0	0	0
Skipped	0	0	0	0	0
Won't Fix	0	0	0	0	0
Total	0	1	3	4	8

3. Test Case Analysis

This report summarizes the execution status of all functional and security test cases.

Section	Total Cases	Not Tested	Fail	Pass
User Management	5	0	0	5
Group Management	3	0	0	3
Role Management	4	0	0	4
Project Table	5	0	0	5
Task Table	6	0	0	6
Access Control (ACL)	6	0	0	6
Flow Designer Workflow	5	0	0	5
Workflow Approval	4	0	0	4
Security Validation	4	0	0	4
Performance Testing	3	0	0	3
Final Validation	3	0	0	3
Total	48	0	0	48

4. User Acceptance Test Summary

Test Scenario	Expected Result	Actual Result	Status
Create Users	Users Alice and Bob are created successfully	Successfully created	Pass
Create Group	Project Team group is created	Successfully created	Pass
Create Roles	Project Manager and Team Member roles created	Successfully created	Pass
Assign Roles	Users receive correct roles	Successfully assigned	Pass
Assign Users to Group	Alice and Bob added to Project Team group	Successfully assigned	Pass
Create Project Record	Project Manager can create projects	Working correctly	Pass
Create Task Record	Project Manager can create tasks	Working correctly	Pass
ACL Validation	Team Member cannot modify restricted records	Access restricted correctly	Pass

Test Scenario	Expected Result	Actual Result	Status
Task Update	Team Member can update Status and Work Notes	Working correctly	Pass
Flow Designer Execution	Status automatically updates and approval is sent to Alice	Executed successfully	Pass
Approval Process	Alice receives approval request	Working correctly	Pass
Notifications	Workflow notifications generated successfully	Working correctly	Pass

5. Conclusion

The User Acceptance Testing was successfully completed for the **Optimizing User, Group, and Role Management with Access Control and Workflows** application. All planned functional, security, and workflow test cases passed successfully.

The application correctly implements Role-Based Access Control (RBAC), Access Control Lists (ACLs), user and group management, project and task management, and Flow Designer automation. The system meets all project requirements and is ready for deployment, demonstration, and final evaluation.

Overall UAT Status:  **PASS**
